You will get a screen that looks like this:

The left side is your computer, the right side is my server

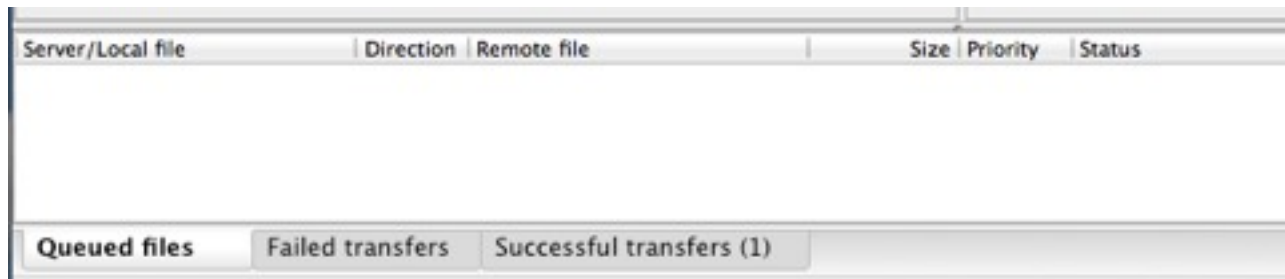

Find the document or file you wish to upload on the left side of the Filezilla Screen and drag it to the right side, hovering over the little blue file folder called “video”. Let go and the file will begin to upload.

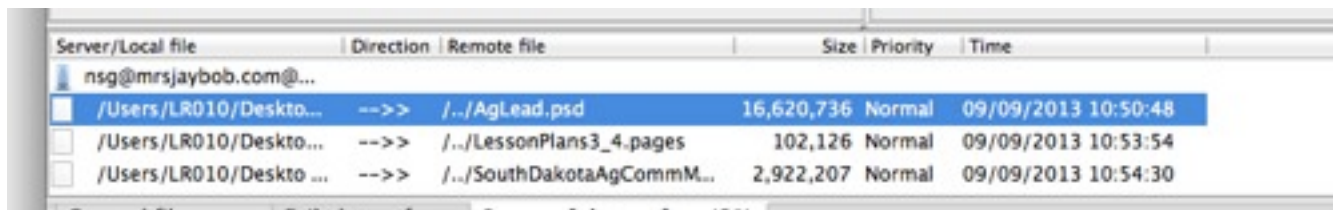

You will see your file appear in the lower screen and you'll be able to watch it's upload progress.

For some reason, my computer is not playing nicely with me today. I am not able to see the top of the Filezilla page. Just a heads up that my screen shots may look a little different than what you see.

Once the video is uploaded we'll be able to configure a link for people to watch the video.

Let me know what questions you have.
